

Body Cap Lens 9mm 1:8.0

- Incredibly slim & compact
- Protection where ever you go
- Ideal for instant snapshots
- Closing mechanism to function as a body cap

The lens the size of a body cap

It might look and act like a protective body cap, but this useful piece of equipment is actually an ultra-slim 9mm 1:8.0 fisheye lens as well. With its small-scale dimensions with a length of only 12,8mm, it is ever ready for capturing wide-angle fisheye shots whenever a photo opportunity comes your way. You can also shoot as near as 0.2m to your subjects, opening up endless scope for taking fascinating close-ups. Its extremely compact size means that you can simply keep it on your camera body as a protective body cap the rest of the time, keeping your camera as lightweight as possible.
