

HVL-F20M

Bright, compact, high-quality flash

Compact external flash with GN20, adjustable head and wireless control

- Throw light further than a built-in camera flash
- Adjust the head for pro-style bounce flash effects
- Travel light with a compact, easy-to-use design

Features

More power than your camera's built in flash

Lighten portraits, group scenes and interiors with a flash rating of guide number 20 (m, ISO100)

Brighten any scene with less to carry

The light, compact flash folds down neatly on the camera to save space when it's not needed

Lift and shoot

Just raise the flash head to switch on power and you're ready to start shooting

Get pro-style bounce effects

Twist the angle of the flash head to bounce light off ceilings at up to 75 degree angles, for more natural illumination

Easily attaches to your camera

With the Multi Interface Shoe you can quickly fix the flash to your camera when you're out and about

No wires needed

Trigger other wireless flash units around the room to create professional looking multi-flash effects without harsh shadows

Colour that looks more real

The flash works with your camera, automatically adjusting white balance for natural-looking colours
